Training Program on

"Effective Use of Cloud Computing in Administrative and Professional Scenario"

Report

Date: 08-10-2014   **Time: 11.00 AM**

Training programme on "**Effective Use of Cloud Computing in Administrative and Professional Scenario**" was organized by Rayat Shikshan Sanstha's C. D. Jain College of Commerce, Shrirampur and Sponsored by IQAC on 8th October 2014.

Inaugural Function:

The Inaugural session of this workshop was chaired by IQAC Chairman Principal Dr.Bhor L.D (Principal C.D.Jain College of Commerce, Shrirampur.) and Resource Person Miss Duggal S.A (Assistant Professor C. D. Jain College of Commerce, Shrirampur.) 33 26 Participants was present for this training programme. Prof. More Vivek gave an introductory speech.

Technical Session:

Resource Person Prof. Duggal S.A explained whenever you travel through a bus or train; you take a ticket for your destination and hold back to your seat till you reach your destination. Likewise other passengers also takes ticket and travel in the same bus with you and it hardly bothers you where they go. When your stop comes you get off the bus thanking the driver. Cloud computing is just like that bus, carrying data and information for different users and allows to use its service with minimal cost.

Cloud computing is becoming an adoptable technology for many of the organizations with its dynamic scalability and usage of virtualized resources as a service through the Internet. It will likely have a significant impact on the educational environment in the future. Cloud computing is an excellent alternative for educational institutions which are especially under budget shortage in order to operate their information systems effectively without spending any more capital for the computers and network devices. Universities take advantage of available cloud-based applications offered by service providers and enable their own users/students to perform business and academic tasks. In this paper, we will review

what the cloud computing infrastructure will provide in the educational arena, especially in the universities where the use of computers are more intensive and what can be done to increase the benefits of common applications for students and teachers.

She also explained that, world of education and training has always embraced new teaching methods and tools, albeit at different rates of take-up. Since the arrival of the computer and later the internet in classrooms, administration departments and our daily lives, schools in the widest sense of the term have been in a race to keep up with society's requirements.

Mrs. Gujar P.S. Moved vote of thanks of this training Session.
